The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).  - Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).  Status						
1)⊠	Responsive to communication(s) filed on $\underline{\textbf{22}}$	September 2003.				
2a)⊠	This action is <b>FINAL</b> . 2b) ☐ Th	is action is non-final.				
3)[	3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under <i>Ex parte Quayle</i> , 1935 C.D. 11, 453 O.G. 213.					
Disposition of Claims						
4) Claim(s) 4-7,10-12,14 and 17-40 is/are pending in the application.  4a) Of the above claim(s) 18-40 is/are withdrawn from consideration.  5) Claim(s) is/are allowed.  6) Claim(s) 4-7,10-12,14 and 17 is/are rejected.  7) Claim(s) is/are objected to.  8) Claim(s) are subject to restriction and/or election requirement.						
Application Papers						
<ul> <li>9) The specification is objected to by the Examiner.</li> <li>10) The drawing(s) filed on is/are: a) accepted or b) objected to by the Examiner.  Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).</li> <li>11) The oath or declaration is objected to by the Examiner. ## **DETAILED ACTION**

## Election/Restrictions

Newly submitted claims 18-40 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: a different active ingredient is used in the treatment. Claim 17 will only be examined in terms of it reading on GLP-1 (7-36) amide since it was originally presented.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 18-40 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

This application contains claims directed to the following patentably distinct species of the claimed invention: the many different species of GLP-1. Namely the species in claims 17-19.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 4 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim

Application/Control Number: 09/982,978

Art Unit: 1654

is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Art Unit: 1654

The species of GLP-1 (7-36) amide will be examined only since it was originally presented.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

## Claim Rejections - 35 USC § 103

Claims 4-7,10-12,14 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Aspnes et al. (col. 15, the claims) or DuBois (col. 18-20, 24, the claims) in view of Horikawa et al. (col. 13).

Applicant argues that there is no connection between using GLP-1 (7-36) amide to treat diabetes and treating diabetic cardiomyopathy.

Aspnes and DuBois both establish that GLP-1 (7-36) amide is know to be used to treat diabetes.

Horikawa establishes that diabetic patients often experience conditions such as cardiomyopathy.

Thus, it is well within the purview of the skilled artisan to treat a patient who has diabetic cardiomyopathy since GLP-1 (7-36) amide is know to be used to treat diabetes and diabetic patients are known to experience cardiomyopathy.

Application/Control Number: 09/982,978

Art Unit: 1654

Claims 4-7,10-12,14 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Efendic (col. 1, 3, 11, examples, claims) in view of Horikawa et al. (col. 13).

Applicant presented the same arguments as above.

Efendic teaches that GLP-1 (7-36) amide is know to be used to treat diabetes and that diabetic patients often experience diabetic cardiomyopathy.

Horikawa establishes that diabetic patients often experience conditions such as cardiomyopathy.

Thus, it is well within the purview of the skilled artisan to treat a patient who has diabetic cardiomyopathy since GLP-1 (7-36) amide is know to be used to treat diabetes and diabetic patients are known to experience cardiomyopathy.

This is a RCE of applicant's earlier Application No. 09/982978. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Page 6

Art Unit: 1654

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael V. Meller whose telephone number is 703-308-4230. The examiner can normally be reached on Monday thru Friday: 9:00am-5:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brenda Brumback can be reached on 703-306-3220. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0196.
